Mold & Automation Project One-Stop Manufacturer

模具和自动化设备一站式生产商

- **Injection mould**
- **Robot**
- **Non-standard customized automatic equipment**
- **Disposable cutlery full automatic packing system**
- **IML system**

Mold & Automation Equipment Project One-Stop Manufacturer

Dongguan Uge Automation Technology Co.,Ltd, a professional design and produce in automatic equipment, 2018 we founded in Huangyan Taizhou, and in 2021 we moved in Dongguan.

We are major in Design & manufacture in robot, IML system and disposable cutlery full automatic packing system and Non-standard customized automatic equipment maker in China

We have our own design & reseach & development & manufacture team

We give customer good purchasing experience, can help customer save much time, The most important thing is to help customers reduce a lot of unnecessary trouble. Perfect to help customers achieve purchasing goals and Provide good service to customers.

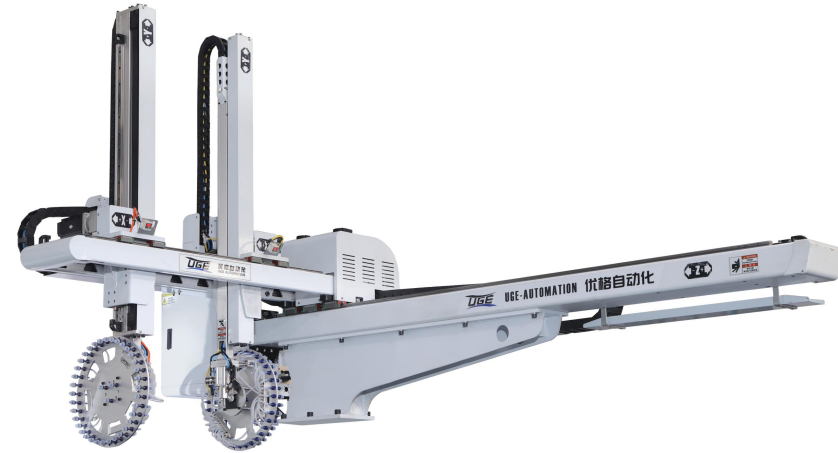

3 axis take out robot

we make it and advise you mode according to your product and injection machine tonnage.

our robot have high quality and stable capability

we also can custom made according to your request

5 axis take out robot

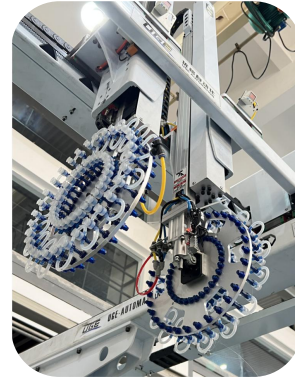

**spoon / fork / knife full automatic packing system
double work position**

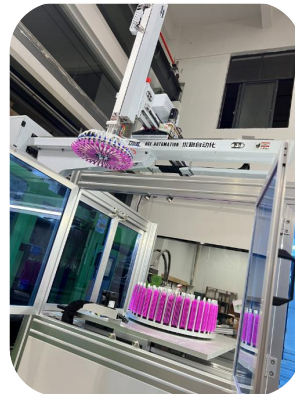

stacking mould + full automatic packing system

spoon / fork / knife full automatic packing system single work position

packing line

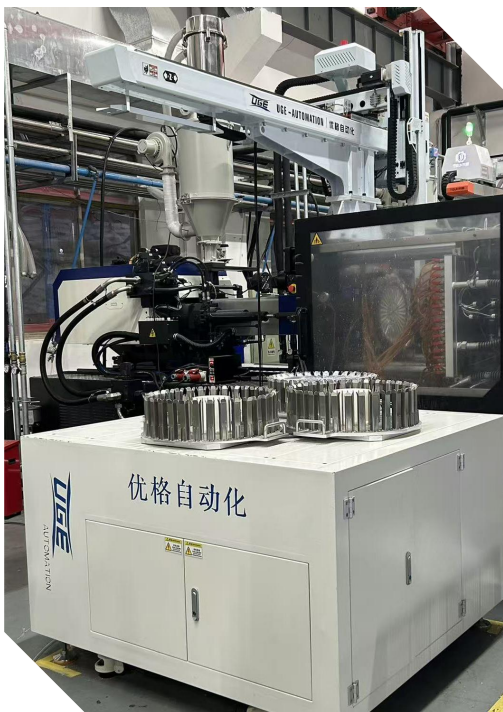

made by UGE AUTOMATION

spoon / fork / knife single piece pack & mixed pack
